

QUICK CONNECT UNIT

Overview:

The Platinum Control Quick Connect Unit comes standard with a Platinum BMS unit, fuel train, stand, and junction box.

Originally developed to streamline the installation process, the Quick Connect Unit slashes the total setup time by 80% and helps to prevent operational faults caused by installation errors.

Extremely flexible in design, the Quick Connect Unit has multiple load-out options enabling you to customize a unit that works best for your operations.

Features:

- All-in-one, ready to install unit
- Pre-wired components make for an easy, no hassle installation
- Multiple package options to meet application needs
- Unit is fully tested for connections and leaks
