

# COMPACT QCU

**Overview:**

A new *slimmed* down version of Platinum Control's Quick Connect Unit, the Compact QCU comes standard with a Platinum BMS unit, fuel train and mount.

The Compact QCU not only cuts down on installation time but also offers a lower price point than the standard QCU. Although extremely small in footprint, the compact fuel train provides all the safety features required for safe and reliable operation of natural draft burners (ESD solenoid, soft start, adjustable pressures).

Extremely flexible in design, the Compact QCU has multiple load-out options enabling you to customize a unit that works best for your operations.

**Features:**

- All-in-one, ready to install unit
- Pre-wired components make for an easy, no hassle installation
- Multiple package options to meet application needs
- Unit is fully tested for connections and leaks
